- Napomene:**
- TRICLAMP priključci se osim po DIN standardu proizvode i po ISO i BS, kao i po nekim tvorničkim standardima.
 - Kod TRICLAMP priključaka se pod nazivnom veličinom NV podrazumijeva vanjski / unutarnji promjer glave, s tim da unutarnji promjer glave ujedno odgovara unutarnjem promjeru nogice za varenje.
 - TRICLAMP poklopci i stega su zajednički za sve TRICLAMP priključke koji imaju glavu istog vanjskog promjera.
